# **Mallet Court Nursery**

We are delighted to introduce our new Plant List for 2023/2024.

Our Propagator/Manager, Jadi Balazs, continues to be full of enthusiasm and has introduced many new and interesting plants, some rare. We continue to increase our collections.

We specialise in growing trees and shrubs from seed and cuttings. Unfortunately, it is getting more difficult to get seed from native stands due to plant health regulations. We try to get the nomenclature correct but we receive seed which sometimes is wrongly named and sometimes has no name at all so please bear with us: we do try our best to get it right!

We only have a small stock of the rarer plants, and these will be offered on a first come, first served basis.

We have some larger trees (not less than 2m to 2.5m) and shrubs. These are marked  ${\bf L}$  in the Catalogue

#### **Mail Order Service**

We dispatch container-grown plants throughout the year. Bare root trees and shrubs are sent throughout the dormant season, October to March. All orders are sent out with APC on a 'next day' service. We have not yet received a pricing schedule so we can only estimate the cost of delivery in advance. If there will be no one to accept delivery, please send instructions with your order detailing where plants may be safely left.

APC require all consignments to be boxed and will not take items which are over 2.2m in length.

Plants will be dispatched on receipt of payment unless a prior arrangement has been made.

We will continue to send plants to EEC countries notwithstanding that we have now left the EEC. Dispatch is now subject to various regulations and a Phytosanitary Certificate (for which we are charged: this cost is payable by the customer) must accompany all plants. All requirements of the destination country must be adhered to: an import licence may be required. Transport delays may be expected at the border where a full inspection will be made.

Please do not hesitate to contact us for any advice or questions.
